Notice to Primary Exporters of hazardous waste from the United States:

Hazardous waste shipments from the U.S. are being returned from Canadian receiving facilities, and EPA has become concerned that many of these return shipments are not in compliance with applicable requirements. The Resource and Conservation and Recovery Act (RCRA) requires tracking of hazardous waste "from cradle to grave", including shipments from (or to) a foreign country. Undocumented returns of hazardous waste into the U.S. are of no less concern to EPA than undocumented imports of hazardous waste from foreign sources.

Primary exporters of hazardous waste will be held accountable for RCRA requirements that apply when their waste is rejected and is subject to return. Where the waste cannot be delivered to the designated Canadian primary or alternate facility, the exporter must comply with Title 40 of the Code of Federal Regulations, Subpart E. Among other things, this requires the exporter to instruct the transporter to revise the *uniform hazardous waste manifest* (EPA Form 8700-22) to identify the new facility or to return the waste to the exporter, in accordance with Section 262.54(g). When an undelivered or rejected shipment is returned to the U.S., Section 262.55(c) requires that the exporter file and *exception report* with:

Office of Enforcement and Compliance Assurance
Office of Federal Activities
International Compliance Assurance Division (MC 2254A)
United States Environmental Protection Agency
1200 Pennsylvania Avenue, NW
Washington, DC 20460

The shipment must also be in conformity with all requirements of Canadian law.

Noncompliance with U.S. requirements may result in an EPA enforcement action of criminal, civil-judicial, or administrative nature. Administrative civil penalties may be assessed at the rate of \$37,500 for each shipment and for each day of violation.
